

Applying for partial approval for the construction and operation of an installation

If you wish to erect and/or operate part of a new installation, you must apply for a partial permit from the competent authority.

Competent Department

- [Die Senatorin für Umwelt, Klima und Wissenschaft I Referat 23](#)
- [Gewerbeaufsicht des Landes Bremen, Dienstort Bremen](#)
- [Gewerbeaufsicht des Landes Bremen, Dienstort Bremerhaven](#)
- [Landesamt für Bergbau, Energie und Geologie](#)

Basic information

Due to their nature or operation, parts of installations may cause harmful effects on the environment or otherwise endanger, significantly disadvantage or disturb the general public or the neighborhood.

If you wish to erect or operate a plant, you require a partial permit from the competent authority. A partial permit can be applied for and granted if the full permit for a requested installation has not yet been granted, but the following conditions are met:

- There is a legitimate interest in the granting of a partial permit,
- the approval requirements for the object of the partial approval applied for are met and
- a preliminary assessment shows that there are no insurmountable obstacles from the outset to the construction and operation of the entire installation with regard to the licensing requirements.

Requirements

- The sub-project fulfills the requirements of the Federal Immission Control Act.
- The sub-project does not conflict with any other public law regulations or occupational health and safety concerns.
- A preliminary assessment has shown that there are no a priori insurmountable obstacles to the construction and operation of the entire plant with regard to the permit.
 - The preliminary overall assessment is no longer binding if the factual or legal situation or individual inspections change in the course of subsequent partial approvals and the assessment changes as a result. In this case, the authority may refuse the permit or further partial permits.

What documents do I need?

- ELiA forms
 - (Electronic immission control application), available on the website of the Trade Supervisory Authority of the State of Bremen
- Required drawings, plans or expert opinions
- Explanatory notes on the system
- Other documents
 - If necessary, ask the competent authority

Procedure

The approval procedure requires a written application, which must be accompanied by the drawings, plans, expert opinions and explanations as well as other documents required to check the approval requirements.

- If your application is complete, it must be published together with the documents and then displayed for one month. In simplified approval procedures or if public participation is waived, there is no public display and no discussion meeting.
- At the latest at the same time as the public announcement of the project, the licensing authority shall request the authorities to be involved to submit their comments on the licensing requirements within one month.
- If the approval requirements are met, the authority examines whether there is a legitimate interest in the construction and operation of the sub-project.
- A preliminary assessment will determine whether there are no insurmountable obstacles to the construction and operation of the entire facility with regard to the partial approval requirements.
- You will receive notification of the approval or rejection of the partial project.

Legal bases

- [Kostenverordnung der Umweltverwaltung \(UmwKostV\)](#)
- [§ 10 Gesetz zum Schutz vor schädlichen Umwelteinwirkungen durch Luftverunreinigungen, Geräusche, Erschütterungen und ähnliche Vorgänge \(Bundes-Immissionsschutzgesetz – BImSchG\)](#)
- [§ 8 Gesetz zum Schutz vor schädlichen Umwelteinwirkungen durch Luftverunreinigungen, Geräusche, Erschütterungen und ähnliche Vorgänge \(Bundes-Immissionsschutzgesetz – BImSchG\)](#)

What deadlines must be paid attention to?

You must apply for approval before you start the project.

How long does it take to process

Depending on the individual case.

What are the costs?

The fees depend on the individual case. They are based on the Environmental Administration Cost Ordinance (UmwKostV).
