Basic information

Career guidance for girls and young women

The young generation of women in Germany has a particularly good school education. Nevertheless, girls still disproportionately often choose "typically female" occupational fields or study subjects in the context of their choice of training and studies. As a result, they do not fully exploit their career opportunities; however, companies are increasingly lacking qualified young people, particularly in technical and technology-related fields.

Girls' Day in the State of Bremen

On Girls' Day - Girls' Future Day, schoolgirls have an insight into occupational fields that girls rarely consider in the process of vocational orientation.

Requirements

Schoolgirls from grades 5-12 are allowed to participate in Girls'Day.

Procedure

Legal bases

- [§ 9 Abs. 3 Kinder- und Jugendhilfegesetz \(KJHG\)](#)
- [Artikel 3 Grundgesetz](#)
